

## Caress Me Down – Sublime

Mucho Gusto me llamo Bradley  
I'm hornier than ron Jeremy  
And if you wanna get popped in your knee just  
wipe that look off your bati face

You hate me cause I got what you need  
A pretty little daughter that we call Mixie  
And if you wanna get beat physically  
It will be over in a minute so

She told me to come over and I took that trip  
And then she took out my mushroom tip  
And when it came out it went drip drip drip  
I didn't even know she had the G.I. Joe kung fu grip

\*Chorus\*

And it went uuh and the girl caressed me down  
Uuh and that's that the lovin' sound  
And it went uuh and the girl caressed me down  
Uuh and that's that the lovin' sound

**\*Verse 2\***

When I kiss Mixie it makes me feel horny  
Cause I'm the type of lover with the sensitivity  
When she kiss my neck and tickle me fancy  
She gave me the right kind of love on Sunday morning

En el otro lado es donde vive  
Con mi hijita que se llama Mixie  
Y su hermana si me quiere  
Y ahorita tenemos un bebe

Sus padres, sus tios trataron matar  
But they did not get to far  
Un poco despues, tuve que regresar  
Con un chingo de dinero 'cause you know I'm a star

Me fui a Costa Rica, para tomar y sufear,  
platicava con la raza 'cause they know who we are.  
Si no lo dio cuenta, then I bet you never will.  
You must be a muñeca if you're still standing still.

**\*Chorus\***

And it went uuh and the girl caressed me down  
Uuh and that's that the lovin' sound  
And it went uuh and the girl caressed me down  
Uuh and that's that the lovin' sound

Intro

Riff

**\*Verse 3\***

Me gusta mi reggae, me gusta punk rock  
pero la cosa que me gusta más es panochinta  
Ponga la nalga en la aire if you know who you are  
ponga la nalga en la aire y empieza gritar

No tenga miedo I'm your papi  
Take your chones y los mandan a mí  
Levanta, levanta, tienes que gritar  
Levanta, levanta, tienes que bailar

**\*Chorus\***

and it went uuh and the girl caressed me down  
uuu and that's that the lovin' sound

Riff 2x
